Boing! is a miracle plastic invented in 2101. It is stored as a liquid in an aerosol can, and is sprayed onto the user, where it solidifies and expands into a bubble surrounding the user like a zorb ball. The solid form of Boing! is extremely bouncy. The user can safely jump off a great height, such as a tall building, bounce up again without injury, and continue bouncing until the Boing! sphere runs out of kinetic energy. As this is extremely hazardous outside, it is only permitted indoors in licenced premises such as the Palais De Boing, with unauthorised use carrying a penalty of twenty years. Boing! is also used to play human pinball in giant-sized

It is stored as a liquid in an aerosol can, and is sprayed onto the user, where it solidifies and expands into a bubble surrounding the user like a zorb ball. The solid form of Boing! is extremely bouncy. The user can safely jump off a great height, such as a tall building,**

**bounce up again without injury, continue bouncing until the Boing! sphere runs out of kinetic energy. As this is extremely hazardous outside, it is only permitted indoors in licenced premises such as the Palais De Boing, with unauthorised use carrying a penalty of twenty**
